In my opinion "J. P. F." is decidedly incorrect in his calculations of the policy combinations of numbers known as "horses," "gigs" an "saddles." His gig combinations are all correct, being, as he says, 76,076, but he is, in my judgment, far from correct, as to the "horses" and "saddles." If he looks over his computs tions again he will no doubt find that instead of "borses" and 79,079 "saddles," the correct
